Ford V10 Triton Engine Problems | LAS Motorhomes

The Ford Modular engine is Ford Motor Company's overhead camshaft (OHC) V8 and V10 gasoline-powered small block engine family. The Modular engine received the name from its design and sharing of certain parts among the engine family, starting with the 4.6L in 1990 for the 1991 model year. The name was also derived from a manufacturing plant protocol, "Modular", where the plant and its tooling ...

Ford Triton V10 Engine Problem FIXED! [Full Time RV Living ...

The Ford Triton V10 engine is a 10-cylinder engine with five cylinders in each bank. The engine is made of an iron block, whereas the spark plugs are made of aluminum and steel threads. Therefore, due to differences in the expansion rate of the metals when heated, the spark plugs tend to pop out because aluminum expands more than steel.

What Problems Does the Ford Triton V10 Engine Have?

This article applies to the Ford F-250 Super Duty (1999-2010). The 6.8-liter V10 Triton is a proud member of the Modular engine group since it shared an identical cylinder bore and stroke with the 5.4-liter V8. The V10 is out there to give consumers a gasoline option if they aren't interested in the Power Stroke diesel powerplant.

Ford F-250: Ford V-10 Specs and Information | Ford-trucks

In the 2000-2005 Ford Excursion, the 6.8-liter V10 was good for 310 horsepower and 425 pound-feet of torque. The V10 was used primarily in applications where Ford truck customers might be looking for a gasoline alternative to a diesel. As such, the big mill was found in ¾ and 1-ton pickups, medium-duty vans, van cutaways, and chassis cabs.
