From the Chrysler Six of 1924 to the front-wheel-drive vehicles of the 70s and 80s to the minivan, Chrysler boasts an impressive list of technological "firsts." But even though the company has catered well to a variety of consumers, it has come to the brink of financial ruin more than once in its seventy-five-year history. How Chrysler has achieved monumental success and then managed colossal failure and sharp recovery is explained in *Riding the Roller Coaster*, a lively, unprecedented look at a major force in the American automobile industry since 1925. Charles Hyde tells the intriguing story behind Chrysler-its products, people, and performance over time-with particular focus on the company's management. He offers a lens through which the reader can view the U.S. auto industry from the perspective of the

smallest of the automakers who, along with Ford and General Motors, make up the "Big Three." The book covers Walter P. Chrysler's life and automotive career before 1925, when he founded the Chrysler Corporation, to 1998, when it merged with Daimler-Benz. Chrysler made a late entrance into the industry in 1925 when it emerged from Chalmers and Maxwell, and further grew when it absorbed Dodge Brothers and American Motors Corporation. The author traces this journey, explaining the company's leadership in automotive engineering, its styling successes and failures, its changing management, and its activities from auto racing to defense production to real estate. Throughout, the colorful personalities of its leaders—including Chrysler himself and Lee Iacocca—emerge as strong forces in the company's development, imparting a risk-taking mentality that gave the company its verve.

The Roaring Twenties in New York was a time of exuberant ambition, free-flowing optimism, an explosion of artistic expression in the age of Prohibition. New York was the city that embodied the spirit and strength of a newly powerful America. In 1924, in the vibrant heart of Manhattan, a fierce rivalry was born. Two architects, William Van Alen and Craig Severance (former friends and successful partners, but now bitter adversaries), set out to imprint their individual marks on the greatest canvas in the world--the rapidly evolving skyline of New York City. Each man desired to build the city's tallest building, or 'skyscraper.' Each would stop at nothing to outdo his rival. Van Alen was a creative genius who envisioned a bold, contemporary building that would move beyond the tired architecture of the previous century. By a stroke of good fortune he found a larger-than-life patron in automobile magnate Walter Chrysler, and they set out to build the legendary Chrysler building. Severance, by comparison, was a brilliant businessman, and he tapped his circle of downtown, old-money investors to begin construction on the Manhattan Company Building at 40 Wall Street. From ground-breaking to bricklaying, Van Alen and Severance fought a cunning duel of wills. Each man was forced to revamp his architectural design in an attempt to push higher, to overcome his rival in mid-construction, as the structures rose, floor by floor, in record time. Yet just as the battle was underway, a third party entered the arena and announced plans to build an even larger building. This

project would be overseen by one of Chrysler's principal rivals--a representative of the General Motors group--and the building ultimately became known as The Empire State Building. Infused with narrative thrills and perfectly rendered historical and engineering detail, Higher brings to life a sensational episode in American history. Author Neal Bascomb interweaves characters such as Al Smith and Governor Franklin Delano Roosevelt, leading up to an astonishing climax that illustrates one of the most ingenious (and secret) architectural achievements of all time.
