Ronnie Lessem and Alexander Schieffer's Integral Green Society and Economy series has three overarching aims. The first is to link together two major movements of our time, one philosophical, the other practical. The philosophical movement is towards what many today are calling an 'Integral' age, while the practical is the 'green' movement, duly aligned with that of sustainable development. The second is to blend together elements of nature and community, culture and spirituality, science and technology, politics and economics, thus serving to bring about an 'Integral green' vision, albeit with a focus on business and economics. As such, the authors transcend the limitations to sustainable development and environmental economics, which are overly ecological, if not also technological, in orientation, and exclude social and cultural elements. Thirdly, this particular volume, with Darja Piciga, focuses specifically on Slovenia, as well as on Europe generally, drawing on the particular issues and capacities that this country and continent represents, particularly for sustainable development and social knowledge-based economy. The emphasis on Slovenia arose, not only because it lies at the heart of Europe, but because a specific movement for an Integral Green Slovenian Society and Economy, has been co-evolved there, by the three editors in conjunction with Slovene organisations, communities and movements, with a view to integrating existing and emerging knowledge resources, initiatives and practices into a model, as an alternative to austerity, for Slovenia and other European countries.

Now in its second edition, the little book of smart is newly updated, with extra pages and more illustrations to expand the story of the world's most innovative car brand. It's a fascinating tale, told succinctly and in an entertaining style, complemented by full-color photography throughout. And as the most up-to-date smart book on today's scene.

This book - the sixth volume in a set covering the Porsche 911 models - is the definitive history of the hugely successful 997-series, with in-depth detail on all the road cars sold around the world, as well as the 997's competition exploits.

The ultimate performance guide to the rotary engines built by Mazda from 1978 to the present. Includes: Engine history and identification ? Rotary engine fundamentals ? Component selection and modifications ? Housings and porting ? Rotors, seals, and internals ? Intake and fuel systems ? Exhaust Systems ? Engine management and ignition ? Oil and lubrication systems ? Forced induction ? Nitrous, water and alcohol injection

This book covers the entire history, life and times of the famous British high-performance engineering company, from its 1958 foundation by Mike Costin and Keith Duckworth, through its often-exciting and always fascinating evolution, to its expansion and worldwide success in both motorsport and high-performance road car production.

This is the fascinating story of how the Citroen SM came into being, with company politics and Maserati's involvement covered in detail. The text and pictures then follow the car's progress from its world premier at the 1970 Geneva Show until the final production models were built in July 1975. With 200 mainly color photos, full coverage of production models and a buyers guide this book is the complete Citroen SM resource.

This compendium of everything thats new in cars and trucks is packed with feedback from Canadian drivers, insider tips, internal service bulletins, and confidential memos to help the consumer select whats safe, reliable, and fuel-frugal.

Get the last word on the most up-to-date social media marketing techniques If you're not tweeting, Facebooking, or blogging by now, your business is getting left behind. Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-bogling depreciation)Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway)Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive EngineersGM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago)You can save \$2,000 by cutting freight fees and "administrative" charges)Diesel annual urea fill-up scams cancoast you \$300, including an \$80 "handling" charge for \$25 worth of urea)Leamon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi, and Suzuki
