Instead, students will use their interactive math journal and math textbook as study resources. Throughout the unit, students will work together to solve word problems in their journal. Students can look back at these problems, along with their notes and math writing, to prepare for quizzes and tests.

I created the first set of interactive math journals for second grade, but made it for this time of the school year. I wanted to get it going right away as teachers are experimenting with math rotations during this last few weeks of the school year. It is the perfect time to shake things up and pour in some excitement through a new format.

teacher this coming school year after spending my first year as a 5th-6th teacher. I did math journals with my class and I loved it, but I am not sure if it would be more appropriate for third grade to cut the notebooks or just have a regular notebook like I did this year. Any thoughts or advice?
