the AP Chemistry course." It is worth bearing in mind that you have NOT be exposed to a "first course in chemistry" and, as such, your lab experience is somewhat limited by your special circumstances (AP chemistry as sophomores with only one year of chemistry). Below is a table of the 22 "Recommended Experiments" as listed in the ...

### AP Chemistry Labs

Lab situations on the AP chemistry exam Apr 19, 2016 | AP , Labs | 0 comments As long as the College Board refuse to acknowledge the importance of a lab exam, you can expect the continued reliance on the testing of lab situations on the AP chemistry exam via the inferior pencil and paper method that the multiple-choice and free-response questions offer.

### Lab situations on the AP chemistry exam - Adrian Dingle's ...

The indicator used in the experiment, phenolphthalein, is clear if the solution is acidic and pink when the solution is basic. The color change occurs because if an acidic solution is added to the solution, more HIn is produced. If a basic solution is added, more In<sup>-</sup> is produced.

### Titration Lab - AP Chemistry - Shelly Oh

In this lab, the perfect indicator was phenolphthalein, because it changes color from clear to pink at pH of 7, the neutral point. The point of neutrality was being sought between the HCl and the NaOH, so it would change colors when the acid and base were equal in the solution in the middle.
