With Beelzebub's Tales to His Grandson, G. I. Gurdjieff intended to "destroy, mercilessly . . . the beliefs and views about everything existing in the world." This novel beautifully brings to life the visions of humanity for which Gurdjieff has become esteemed. Beelzebub, a man of worldly (and other-worldly) wisdom, shares with his grandson the anecdotes, personal philosophies, and lessons learned from his own life. The reader is given a detailed discussion of all matters physical, natural, and spiritual, from the creation of the cosmos to man's teleological purpose in the universe. This edition of Beelzebub's Tales to His Grandson--the first single-volume paperback to appear in English--restores the original, authoritative translation.

This book is a thoroughly edited version of the original 1931 manuscript of Beelzebub's Tales to His Grandson by G. Gurdjieff. The text is, for the most part, unchanged from the original manuscript that was published in a limited edition in 1931 under the direction of A R Orage. However some editing to the text has been done to remove obvious typographical errors and to harmonize the spelling of Gurdjieff's many invented names and neologisms to align with the later published version of this classic literary work. In addition a full index is provided, almost to the level of a concordance. It documents all changes to the neologisms and all edits, aside from typographical corrections made to the text. The attraction of this publication lies in the fact that although Gurdjieff approved this original edition for publication and hence regarded his writing effort as almost complete, he subsequently made significant changes to many parts of it, and hence reading the 1931 Manuscript at times feels as though one is reading a different book, but one that nevertheless bears the mark of its author.

This title presents Orage's commentaries on 'Beelzebub's Tales to his Grandson', which are an essential part of the Fourth Way literature. They demonstrate a way of approaching and understanding a work that Orage considered to be literature of the highest kind.

Over one hundred years ago in Russia, G. I. Gurdjieff introduced a spiritual teaching of conscious evolution—a way of gnosis or “knowledge of being” passed on from remote antiquity. Gurdjieff’s early talks in Europe were published in the form of chronological fragments preserved by his close followers P. D. Ouspensky and Jeanne de Salzmann. Now these teachings are presented as a comprehensive whole, covering a variety of subjects including states of consciousness, methods of self-study, spiritual work in groups, laws of the cosmos, and the universal symbol known as the Enneagram. Gurdjieff respected traditional religious practices, which he regarded as falling into three general categories or “ways”: the Way of the Fakir, related to mastery of the physical body; the Way of the Monk, based on faith and feeling; and the Way of the Yogi, which focuses on development of the mind. He presented his teaching as a “Fourth Way” that integrates these three aspects into a single path of self-knowledge. The principles are laid out as a way of knowing and experiencing an awakened level of being that must be verified for oneself.

The second volume of To Fathom the Gist examines in depth how Gurdjieff wrote Beelzebub's Tales to His Grandson and discusses the three ways of reading the book in light of how the book was written. It provides useful perspectives on the book by examining the 1931 Manuscript (the earliest edition of The Tales) and comparing it to Gurdjieff's final version. It also analyzes the 1992 revision of The Tales in depth. Finally, this volume investigates the Arch-absurd-Beelzebub's assertion that our Sun neither lights nor heats.
