Men, jobs, children, personal crises, irreconcilable social gaps—these are just a few of the strange and confusing reasons which may cause a female friendship to end. No matter the cause, the breakup of a female friendship leaves a woman devastated and asking herself difficult questions. Was someone to blame? Is the friendship worth fighting for? How can I prevent this from ever happening again? Even more upsetting is that women suffering from broken friendships often have no one to confide in; while the loss of a romantic partner garners sympathy among peers, discussing the loss of a platonic friend is often impossible without making other friends jealous or uncomfortable. Written by journalist and psychologist Irene Levine, Ph.D., Best Friends Forever is an uplifting and heroically honest book for abandoned friends seeking solace. Dr. Levine draws from the personal testimonials of thousands of women to provide anecdotes and groundbreaking solutions to these complicated situations. Offering tools for personal assessment, case stories, and actionable advice for saving, ending, or re-evaluating a relationship, Levine shows that breakups are sometimes inevitable. Although the dissolution of female friendships can be difficult, Best Friends Forever teaches women to stop blaming themselves and probing the wounds, and that the sad experience of a broken friendship can make them stronger people, and more able to handle their relationships with wisdom.

A guide for women grieving the end of close friendships cites the myriad reasons that platonic relationships between women are discontinued, in an anecdotal reference that draws on personal testimonies to provide tools for personal assessment and helpful tips.

Seven minutes in heaven never felt so good... Valerie Barkin and Alec Rogers survived bullies, awful parents, and seriously shitty social standing the only way best friends can—together. But with the unexpected sexual tension suddenly flaring between them, surviving their ten-year high school reunion might be a different story... Val hasn't changed. She still feels like the stringy-haired band geek the popular kids teased, but Alec has definitely changed. He's now the front man for the Grammy-winning rock band Chronic Disharmony, with the sexual reputation to match. And he's more than willing to help Val rock the reunion. And then it happens—a drunken game of Seven Minutes in Heaven—and their fourteen-years-long foreplay comes crashing to the forefront...changing everything. Seven minutes turns into a weekend of mind-blowing, no-strings-attached sex. But these best friends won't be able to leave their hearts out of it forever, not when the most meaningful benefit could change their relationship for good. Each book in the Most Likely To series is a standalone, full-length story that can be enjoyed out of order. Series Order: Book #1 Best Friends with Benefits Book #2 Wrong Bed Reunion

Losing a friend can be as painful and as agonizing as a divorce or the end of a love affair, yet it is rarely written about or even discussed. THE FRIEND WHO GOT AWAY is the first book to address this near-universal experience, bringing together the brave, eloquent voices of writers like Francine Prose, Katie Roiphe, Dorothy Allison, Elizabeth Strout, Ann Hood, Diana Abu Jabar, Vivian Gornick, Helen Schulman, and many others. Some write of friends who have drifted away, others of sudden breakups that took them by surprise. Some even celebrate their liberation from unhealthy or destructive relationships. Yet at the heart of each story is the recognition of a loss that will never be forgotten. From stories about friendships that dissolved when one person revealed a hidden self or moved into a different world, to tales of relationships sabotaged by competition, personal ambition, or careless indifference, THE FRIEND WHO GOT AWAY casts new light on the meaning and nature of women's friendships. Katie Roiphe writes with regret about the period in her life when even close friends seemed expendable compared to men and sex. Mary Morris reveals how a loan led to the unraveling of a lifelong friendship. Vivian Gornick explores how intellectual differences eroded the bond between once inseparable companions. And two contributors, once best friends, tell both sides of the story that led to their painful breakup. Written especially for this anthology and touched with humor, sadness, and sometimes anger, these extraordinary pieces simultaneously evoke the uniqueness of each situation and illuminate the universal emotions evoked by the loss of a friend.

It happens without warning, and it hits you with devastating force. Your closest girlfriend, the Ethel to your Lucy, the Thelma to your Louise, cuts you off completely. No more late-night phone calls, no more afternoon e-mails, no more catch-up lunches and dinners. She has decided for whatever reason to move on with her life and has left you to figure it out on your own. The experience can be as painful and confusing as a sudden breakup with a significant other, and you replay scenes from the friendship and wonder what you did wrong. Until now, women had to endure the heartache of losing a friend all alone, without the social support and understanding that accompanies, say, a romantic split-up -- and to make matters worse, they don't even have their best friend's shoulder to cry on. But What Did I Do Wrong? gives you that sympathetic shoulder and a resource -- and some answers -- that you can rely on. After author Liz Pryor had gone through a number of these breakups herself, she set out to discover why they were happening, how to help herself -- and others -- get through them..and how to prevent them from happening again. Through personal interviews and her popular website, www.lizpryor.com, Pryor collected hundreds of stories of friendships with which you will identify. Now she draws on those stories to explore the dynamics of friendship breakups in a candid, intimate way, revealing the patterns, the warning signs, and some ways to put a friendship right or help it change to meet your or your friend's changing life. She also explains how to end a friendship -- if you find that you need to do so -- in ways that honor both parties' feelings and your history together. Like the best kind of girlfriend -- one who really will stay friends forever -- Pryor blends plain, old-fashioned, feminine good sense and good humor with genuine empathy for the thousands of women

who live with the confusion that lingers after an ended friendship -- for women of all ages, races, and backgrounds. What Did I Do Wrong? validates your feelings and inspires you to be more forthright and compassionate with new and old friends. It might even lead you to reconnect with a lost one. In the end, you will be moved and uplifted by the many stories of strong friendships, broken friendships, and renewed friendships that make this book a treasure of women's wisdom and experiences.

Discover the unexpected ways friends influence our personalities, choices, emotions, and even physical health in this fun and compelling examination of friendship, based on the latest scientific research and ever-relatable anecdotes. Why is dinner with friends often more laughter filled and less fraught than a meal with family? Although some say it's because we choose our friends, it's also because we expect less of them than we do of relatives. While we're busy scrutinizing our romantic relationships and family dramas, our friends are quietly but strongly influencing everything from the articles we read to our weight fluctuations, from our sex lives to our overall happiness levels. Evolutionary psychologists have long theorized that friendship has roots in our early dependence on others for survival. These days, we still cherish friends but tend to undervalue their role in our lives. However, the skills one needs to make good friends are among the very skills that lead to success in life, and scientific research has recently exploded with insights about the meaningful and enduring ways friendships influence us. With people marrying later--and often not at all--and more families having just one child, these relationships may be gaining in importance. The evidence even suggests that at times friends have a greater hand in our development and well-being than do our romantic partners and relatives. Friends see each other through the process of growing up, shape each other's interests and outlooks, and, painful though it may be, expose each other's rough edges. Childhood and adolescence, in particular, are marked by the need to create distance between oneself and one's parents while forging a unique identity within a group of peers, but friends continue to influence us, in ways big and small, straight through old age. Perpetually busy parents who turn to friends--for intellectual stimulation, emotional support, and a good dose of merriment--find a perfect outlet to relieve the pressures of raising children. In the office setting, talking to a friend for just a few minutes can temporarily boost one's memory. While we romanticize the idea of the lone genius, friendship often spurs creativity in the arts and sciences. And in recent studies, having close friends was found to reduce a person's risk of death from breast cancer and coronary disease, while having a spouse was not. Friendfluence surveys online-only pals, friend breakups, the power of social networks, envy, peer pressure, the dark side of amicable ties, and many other varieties of friendship. Told with warmth, scientific rigor, and a dash of humor, Friendfluence not only illuminates and interprets the science but draws on clinical psychology and philosophy to help readers evaluate and navigate their own important friendships.

When I was new to San Francisco eight years ago, I remember standing at a café window on Polk Street watching a group of women inside, huddled around a table laughing. Like the puppy dog at the pound, I looked through the glass, wishing someone would pick me to be theirs. I had a phone full of far-flung friends' phone numbers, but I didn't yet know anyone I could just sit and laugh with in a café. It hit me how very hard the friendship process is. I'm an outgoing, socially comfortable woman with a long line of good friendships behind me. And yet I stood there feeling very lonely. And insecure. And exhausted at just the idea of how far I was from that reality. I knew I couldn't just walk in there and introduce myself to them. "Hi! You look like fun women, can I join you?" I would have been met with stares of pity. No one wants to seem desperate, even if we are. We don't have platonic pick-up lines memorized. Flirting for friends seems creepy. Asking for her phone number like we're going to call her up for a Saturday night date is just plain weird. All the batting of my eyelashes wasn't going to send the right signals. And so I turned away from the scene of laughter and walked away. No, unfortunately, friendships don't just happen. We Value Belonging Friendships may not happen automatically, but what we crave about them sure seems to! We all want to belong--that need to be connected to others is an inherent desire. We live our entire lives trying to fit in, be known, attract acceptance, and experience intimacy. We desperately want to have others care about us. This book is about that hunger. And more pointedly, it is about listening to it and learning how to fulfill it.

Two teens who build a friendship out of elaborate lies have to decide whether or not their love is true in this witty YA contemporary romance from debut author Tiffany Pitcock. Jenny met Chance for the very first time when she was assigned as his partner in their Junior Communications class. But one clever lie to rescue a doomed assignment later, and the whole school was suddenly convinced that Little-Miss-Really-Likes-Having-As and the most scandalous heartbreaker in school have been best friends forever. It's amazing how quickly a lie can grow--especially when you really, really want it to be the truth. With Jenny, Chance can live the normal life he's always kind of wanted. And with Chance, Jenny can have the exciting teen experiences that television has always promised her. And through it all, they hold on to the fact that they are "just friends." But that might be the biggest lie of all.

On January 19, 2000, a fire raged through Seton Hall University's freshman dormitory, killing three students and injuring 58 others. Among the victims were Shawn Simons and Alvaro Llanos, roommates from poor neighborhoods who made their families proud by getting into college. They managed to escape, but both were burned terribly. After the Fire is the story of these young men and their courageous fight to recover from the worst damage the burn unit at Saint Barnabas hospital had ever seen. It is the story of the extraordinary doctors and nurses who work with the burned. It is the story of mothers and fathers, of faith and family and the invisible ties that bind us to each other. It is the story of the search for the arsonists -- and the elaborate cover-up that nearly obscured the truth. And it is the story of the women who came to love these men, who knew that real beauty is a thing not seen in mirrors.

One of the country's most distinguished and critically acclaimed solo dancers and choreographers debunks the myth that dancers must retire from professional life as performers in their early forties. A performing artist since 1940, Daniel Nagrin initiated his own career as a solo performer in 1957 at the age of forty. With great wisdom and wit, this fiercely passionate veteran gives us an unusual and much-needed book that combines theory, personal philosophy, experience, and knowledge about dancers, dancing, teachers, mentors, and technique with practical information that ranges from nutrition, healers and treatments, sex, meditation, kneepads, and toe grips to the special problems and needs of dancers over fifty.
