Solutions Manual for Organic Chemistry 7th Edition By Brown

Hydrocarbons are organic compounds that contain only carbon and hydrogen.The four general classes of hydrocarbons are: alkanes, alkenes, alkynes and arenes. Aromatic compounds derive their names from the fact that many of these compounds in the early days of discovery were grouped because they were oils with fragrant odors.

The general chemistry text at most universities is pretty decent. Most use Brown, LeMay, Bursten, which is a great introduction to the chemical sciences. The old editions are fine, I compared a 1997 edition Brown (\$4.00 including shipping) to the 2014 edition of Brown (\$250), it's 99% identical. It is important to do many of the problems, since chemistry is a quantitative science also.
