Presented in a question-answer format, "Problems and Solutions in Advanced Accounting for CA Intermediate" is specially designed for the students who are preparing for Group-II, Paper 5: Advanced Accounting. The content has been carefully carved out to cover the problems that are most frequently asked in examinations and are aligned to the syllabus. Care has been taken to include problems of simple as well as complex nature and solutions to most of the problems have been provided in a step-by-step manner which makes it easier for the student to understand the concepts and fetch marks. Salient Features: ? Content is strictly aligned to the topical flow as guided by the syllabus of ICAI. ? Coverage of Questions from RTPs and MTPs of ICAI examination. ? Thoroughly updated content includes latest changes in Accounting and the Companies Act, 2013. ? Questions from previous year ICAI examinations, Revisionary Test Papers (RTPs), Mock Test Papers (MTPs), and other professional bodies have been incorporated to provide enhanced understanding and extensive practice to the students. ? Each chapter is further subdivided in various sections to develop the concepts in a methodical manner.

This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.

Accounts being a tough practical subject, students find it difficult to keep up with the theoretical concepts and practical problems at the same time. There remains a need for the book which helps students practice ample problems on every topic and be exam ready. Keeping this in mind, the authors present Problems and Solutions in Accounting to cater to the needs of CA Intermediate students appearing for Group-I, Paper 1: Accounting as per the new syllabus scheme of ICAI. The book has been neatly organised into Sections and Sub-sections each dedicated to fundamental topics of Accounting. For easy, navigation through a chapter, the number of problems dedicated to a topic and the type of problems covered have been listed in detail at the beginning. Salient Features: ? Content is strictly aligned to the topical flow as guided by the syllabus of ICAI. ? Coverage of Questions from RTPs and MTPs of ICAI examination. ? Thoroughly updated content includes latest changes in Accounting and the Companies Act, 2013. ? Questions from previous year ICAI examinations, Revisionary Test Papers (RTPs), Mock Test Papers (MTPs), and other professional bodies have been incorporated to provide enhanced understanding and extensive practice to the students. ? Each chapter is further subdivided in various sections to develop the concepts in a methodical manner.

IPCC Report on sources, capture, transport, and storage of CO₂, for researchers, policy-makers and engineers.

Accountancy & Quick Revision for CA IPCC (Group -II)

In engineering design and development, reliable and accurate computational methods are requested to replace or complement expensive and time consuming experimental trial and error work. Tremendous advancements have been achieved during recent years due to improved numerical solutions of non-linear partial differential equations and computer developments to achieve efficient and rapid calculations. Nevertheless, to further progress in computational methods will require developments in theoretical and predictive procedures – both basic and innovative – and in applied research. Accurate experimental investigations are needed to validate the numerical calculations. This book contains the edited versions of the papers presented at the Tenth International Conference on Advanced Computational Methods and Experimental Measurements in Heat Transfer and Mass Transfer held in Maribor, Slovenia in July 2008. The objective of this conference series is to provide a forum for presentation and discussion of advanced topics, new approaches and application of advanced computational methods and experimental measurements to heat and mass transfer problems. The contributed papers are grouped in the following appropriate sections to provide better access for readers: Natural and forced convection; Heat exchangers; Advances in computational methods; Heat recovery; Heat transfer; Modelling and experiments.

For CA, CS, ICWA, MBA, BBA, CFA and Unified Syllabus of UGC for B.Com. And M.com. has been taken into consideration. A large number of new problems set in latest examinations have been included. Almost all chapters have been revised, updated and re-arranged.
