Page caching refers to caching the content of a whole page on the server-side. Later when the same page is requested again, its content will be served from the cache instead of regenerating it from scratch. Page caching is supported by yii\filters\PageCache, an action filter. It can be used like the following in a controller class:

Caching: Page Caching | The Definitive Guide to Yii 2.0 ...

What is the Cache-Control Header. Cache-control is an HTTP header used to specify browser caching policies in both client requests and server responses. Policies include how a resource is cached, where it 's cached and its maximum age before expiring (i.e., time to live). The cache-control header is broken up into directives, the most common of which are detailed below:

What is Cache-Control and How HTTP Cache Headers Work ...

Checking a cached version of a page instead of the current live version is useful if the original page is unreachable due to an Internet congestion or if the website is down, overloaded or slow, or simply if the web page has been removed by the site owner. Cached pages are usually saved and stored by large companies with

This guide shows you how to use Chrome DevTools to inspect Cache data. If you're trying to inspect HTTP cache data, this is not the guide you want. The Size column of the Network Log has the...

View Cache Data With Chrome DevTools | Google Developers

Page Cache Lifetime - the option displays a period of time the page cache is valid. When the indicated time period is over the cache will get the status 'invalid'. A first one who visits a page will get the status 'Cache Miss' (all next visitors get 'Cache Hit'). When the value equals 0, the page cache lifetime will be zero.

Guide for Full Page Cache [Amasty Extensions FAQ]

Caching can be enabled on a per-page basis, and you can set the length of time that a page should remain cached before being refreshed. When a page is loaded for the first time, the file will be cached using the currently configured cache engine.

Web Page Caching — CodeIgniter 4.0.4 documentation

The first of the two caches can be found in Core Terminus, in the first area of the Lost Sector that contains lab equipment and computers (before all the Hive corruption). Look for it along the...

ttl-in-cache. Forces object(s) to become cached, as if they had a Cache-Control: max-age:<time> header. Can be overruled by requests with cookies. The value is the amount of time object(s) are to be kept in the cache, regardless of Cache-Control response headers from the origin server. Use the same time formats as pin-in-cache.

cache.config — Apache Traffic Server 10.0.0 documentation
Fragment caching refers to caching a fragment of a Web page. For example, if a page displays a summary of yearly sale in a table, you can store this table in cache to eliminate the time needed to generate this table for each request. Fragment caching is built on top of data caching. To use fragment caching, use the following construct in a view:

Caching: Fragment Caching | The Definitive Guide to Yii 2 ...
When you use a browser, like Chrome, it saves some information from websites in its cache and cookies. Clearing them fixes certain problems, like loading or formatting issues on sites. In Chrome. On your computer, open Chrome. At the top right, click More . Click More tools Clear browsing data. At the top, choose a time range. To delete everything, select All time. Next to "Cookies and other ...
