Keep your Mac safe from intruders, malware, and more! Version 1.3, updated November 23, 2021 Secure your Mac against attacks from the internet and physical intrusion with the greatest of ease. Glenn Fleishman guides you through configuring your Mac to protect against phishing, malware, network intrusion, social engineering, and invaders who might tap physically into your computer. Glenn teaches how to secure your data at rest and in motion. Learn about built-in privacy settings, the Secure Enclave, FileVault, sandboxing, VPNs, recovering a missing Mac, and much more. Covers Catalina, Big Sur, and Monterey. The digital world has never seemed more riddled with danger, even as Apple has done a fairly remarkable job across decades at keeping our Macs safe. But the best foot forward with security is staying abreast of past risks and anticipating future ones. *Take Control of Securing Your Mac* gives you all the insight and directions you need to ensure your Mac is safe from external intrusion and thieves or other ne'er-do-wells with physical access. Security and privacy are tightly related, and *Take Control of Securing Your Mac* helps you understand how macOS has increasingly compartmentalized and protected your personal data, and how to allow only the apps you want to access specific folders, your contacts, and other information. Here's what this book has to offer:

- Master a Mac's privacy settings
- Calculate your level of risk and your tolerance for it
- Learn why you're asked to give permission for apps to access folders and personal data
- Moderate access to your audio, video, and other hardware inputs and outputs
- Get to know the increasing layers of system security through Catalina, Big Sur, and Monterey
- Prepare against a failure or error that might lock you out of your Mac
- Share files and folders securely over a network and through cloud services
- Set a firmware password and control other low-level security options to reduce the risk of someone gaining physical access to your Mac
- Understand FileVault encryption and protection, and avoid getting locked out
- Investigate the security of a virtual private network (VPN) to see whether you should use one
- Learn how the Secure Enclave in Macs with a T2 chip or M-series Apple silicon affords hardware-level protections
- Dig into ransomware, the biggest potential threat to Mac users, but still a largely theoretical one
- Decide whether anti-malware software is right for you

Mackenzie "Kiki" Forbes finds herself in a pickle. Either become her snarky sister's nanny, or move halfway across the country to work as assistant-to-the-stylist of a country music star. Neither job sounds ideal, although bedazzling cowboy boots may be a hell of a lot more interesting than ironing her brother-in-law's underwear. But life on the road as the errand coffee girl for a sold-out tour leaves much to be desired. That is, until Kiki meets her sinfully sexy new boss's boss...Tatum Reed's career is flying high. He's up for country music's Entertainer of the Year and he's headed out on a nationwide sold-out tour. So why does he feel like it's all about to implode? His superstar ex-girlfriend seems determined to make his life difficult, his opening act is a handful, and the new girl on his tour, the feisty brunette, is quickly getting under his skin. In this crazy world of showbusiness Tatum needs to learn who he can trust, but that doesn't come easily, because the

one person who holds all the cards may just throw them down and walk away. Life in the public eye is never all it's cracked up to be, which has both Kiki and Tatum questioning what they're really doing with their careers, and their hearts.

YOU CAN'T MAKE THIS STUFF UP! Here is a hilarious collection that catches real-life knuckleheads in outrageous acts of brazen stupidity, giving new meaning to that famous four-letter word: "DUH"! * The Oregon resident who was waxing his 1984 Pontiac--and somehow managed to shove the antenna up his nose . . . GRANDMOTHER OF EIGHT MAKES HOLE IN ONE * The Atlanta Braves pitcher who was treated for five-inch-long welts after he tried to iron his polo shirt while wearing it . . . MINERS REFUSE TO WORK AFTER DEATH * The inmate at a Chesapeake Correctional Facility who filed a five million dollar lawsuit against himself . . . DRUNK GETS NINE MONTHS IN VIOLIN CASE * The woman who couldn't stand the discomfort of having a callus on her right foot, so she blew off her big toe with a shotgun . . . Radio personality John "Kato" Machay's lively compilation of news stories, headlines, and courtroom gaffes proves hands down that truth is dumber than fiction! REMEMBER: To err may be human, but to laugh out loud is divine.
