Car Stereo Troubleshooting Guide | azrmusic.net

Some car audio problems that are commonly attributed to amps include sound distortion, no sound at all, and even bizarre sounds like farting. Some of this can be caused by a broken amp, but all of them can be caused by other underlying issues that will still be around if you try to fix the problem by throwing a new amp at it.

Common Car Amp Problems (And How to Fix Them)

Check the Fuses. After you have verified that the unit is actually failing to power up and that it hasn't entered an anti-theft mode, the next step is to check the fuses. At this point, you'll want to break out some basic car diagnostic tools, like a multimeter and a test light.
