Laboratory Investigation of Challenging Hemostasis Cases

Real-time awareness of a patient's blood clotting ability, or hemostasis, in an emergency or surgical setting is crucial for doctors to be able to maintain patient coagulation equilibrium. Oftentimes, hemostasis analysis is completed in a hospital's central laboratory, separate from the surgical theater.

Haemonetics: TEG 6s Hemostasis Analyzer System | Case Study

The current article presents clinical and laboratory features of two cases in which pediatric patients are evaluated for bleeding disorders. Discussion of the cases focuses on practical considerations for laboratorians. Review of these case studies highlights selected common and esoteric issues in pediatric hemostasis testing.
