Describe the changes observed in the red onion cells after you added salt solution.

The cell membrane and its contents pulled away from the cell wall.

Diffusion Through a Membrane Lab
Flashcards | Quizlet
BACKGROUND Diffusion is a process that

Read PDF

Diffusion

allows ions or molecules to move from where they are more concentrated to where they are less concentrated. This process accounts for the movement of many small molecules across a cell membrane. Diffusion allows cells to acquire food and exchange waste

Diffusion through a
Membrane

Introduction

Molecules are
constantly moving.

They move in straight
lines unless they are

Read PDF

Diffusion

deflected by other molecules or obstacles in their environment.

Diffusion is the process by which the collisions between molecules cause them to continually spread apart from each other.

Understanding of
Diffusion and
Osmosis The purpose
of this lab was to
have a basic
understanding about
concepts diffusion
and osmosis. In this
lab we had dialysis
tube as a cell
membrane of cell,
which lets small
particles pass
through it and we

Read PDF

Diffusion

had test tube as tightly joined surface, which doesn't let any particles pass through it. As a result we saw that small particles like glucose and iodine diffused through dialysis tube, but large particle like starch couldn't diffuse ...
