Check out a preview. More than any other introductory psychology textbook, the Hockenburys' brief book is the one in which students see themselves – and the world they live in. The new edition builds on that distinction, presenting the discipline with a unique understanding of today's students in all their diversity, emphasizing the field's immediate impact on their lives. Without sacrificing science, Don and Sandy Hockenbury draw on personal experiences and anecdotes to illustrate essential concepts and important research directions. In this fresh new offering to the Intro Psychology course, authors John Cacioppo and Laura Freberg portray psychology as being an integrative science in two ways. First, they have written a text that reflects psychology's rightful place as a hub science that draws from and is cited by research in many other fields. Second, this text presents psychology as a unified science that seeks a complete understanding of the human mind, rather than as a loosely organized set of autonomous subspecialties. As psychology moves rapidly toward maturity as an integrative, multidisciplinary field, the introductory course offers an opportunity to teach all of psychology in one place and at one time. This text reflects that evolution--and the authors' excitement about it. More than any other psychology textbook, Don and Sandra Hockenbury's Psychology relates the science of psychology to the lives of the wide range of students taking the introductory course. Now Psychology returns in a remarkable new edition that shows just how well-attuned the Hockenburys are to the needs of today's students and instructors. Psychology began with a basic idea: combine scientific authority with a narrative that engages students and relates to their lives. From decades of experience teaching, the Hockenburys created a book filled with cutting-edge science and real-life stories that draw students of all kinds into the course.

Learning is an adventure—now students can see just how exciting it can be with Psychology: A Journey. In a course where professors are frequently confronted with students who haven't actually read their textbooks, Psychology: A Journey offers a proven and trusted solution: this popular text presents psychology in a way that sparks readers' curiosity, insights, imagination, and interest—getting students "hooked" on psychology and making them eager to read on. Journey's Canadian edition succeeds at covering not only essential topics at the core of psychology but many others at the cutting edge of current knowledge. The first psychology textbook to integrate the proven SQ4R (Survey, Question, Read, Recite, Reflect, and Review) active learning system, Journey helps readers grasp major concepts, develop a broad understanding of psychology's diversity, and see for themselves how psychology relates to the challenges of everyday life. Because readers become actively involved with the material, they develop a basic understanding of psychology that they take with them into their future courses and careers.

Mastering the World of Psychology is a brief, paperback text focused on supplying the most support for student learning and student success. It makes the connection between scientific principles and the everyday lives of today's diverse student population.

In this textbook, Simon LeVay and Janice Baldwin aim to help students understand the diversity of human sexual expression as well as the diversity of perspectives from which sexuality can be studied. Well-known for its high-quality presentation of biological aspects of sexuality, the book also devotes rich coverage to the insights gained from cognitive science, social psychology, sociology, feminism, and cross-cultural studies, along with both moral and political discourse on sexual themes. The Fourth Edition provides up-to-date coverage of all topics, ranging from gay marriage in New York to the latest developments in contraceptive technology and exciting findings on pre-exposure prophylaxis against HIV. Still the leader in terms of its biological coverage, the Fourth Edition also has expanded coverage of many other issues, ranging from sex-therapy exercises to learning theories of gender and paraphilias.

INTRODUCTION TO COUNSELING: VOICES FROM THE FIELD, Eighth Edition, provides students with a comprehensive overview of the counseling profession while encouraging them to examine the day-to-day realities of being a counselor and their motivation for choosing the profession. Coverage includes information on what counseling is as well as its history, theoretical orientations, applications, and professional issues. As students become engaged in the process of learning and applying counseling concepts, they get an unparalleled look at what their professional futures may hold. Voices from the Field sections in each chapter offer further insight into the real challenges faced by experienced practitioners, as well as the ways in which those challenges were resolved.
