A powerful tribute to feminist sci-fi about bicycles. It gravitates away from the unfortunately-traditional macho heroes, hurtling through space with giant guns, ready to protect and/or tame their scantily clad space babe. Elly's visions of the future are populated by strong, intelligent, empowered women with complex personalities. Heroines find meaning and freedom on two wheels in the confines of a gated space society and in the ravaged earth left behind. Racers compete in deep space and on otherworldly planets. From fantasy to hard sci-fi to dystopia, there's something for everyone in this little volume that launched a genre.

"This book makes extensive use of worked numerical examples to demonstrate the methods of calculating the capacities of structural elements. These examples have been extensively revised from the previous edition, with further examples added. The worked examples are cross-referenced to the relevant clauses in AS 4100: 1998."--BOOK JACKET.

Korean: A Comprehensive Grammar is a reference to Korean grammar, and presents a thorough overview of the language, concentrating on the real patterns of use in modern Korean. The book moves from the alphabet and pronunciation through morphology and word classes to a detailed analysis of sentence structures and semantic features such as aspect, tense, speech styles and negation. Updated and revised, this new edition includes lively descriptions of Korean grammar, taking into account the latest research in Korean linguistics. More lower-frequency grammar patterns have been added, and extra examples have been included throughout the text. The unrivalled depth and range of this updated edition of Korean: A Comprehensive Grammar makes it an essential reference source on the Korean language.

This book publishes the proceedings from the Third International Workshop on Connections in Steel Structures: Behaviour, Strength and Design held in Trento, Italy, 29-31 May 1995. The workshop brought together the world's foremost experts in steel connections research, development, fabrication and design. The scope of the papers reflects state-of-the-art issues in all areas of endeavour, and manages to bring together the needs of researchers as well as designers and fabricators. Topics of particular importance include connections for composite (steel-concrete) structures, evaluation methods and reliability issues for semi-rigid connections and frames, and the impact of extreme loading events such as those imposed by major earthquakes. The book highlights novel methods and applications in the field and ensures that designers and other members of the construction industry gain access to the new results and procedures.

It takes an obsessive mind to know one. And Daniel Clark knows the elusive killer he's been stalking. He's devoted every waking minute as a profiler to find the serial killer known only as Eve. He's pored over the crime scenes of sixteen young women who died mysterious deaths, all in underground basements or caverns. He's delved into the killer's head and puzzled over the twisted religious overtones of the killings. What Daniel can't possibly know is that he will be Eve's next victim. He will be the killer's first Adam. After sixteen hopeless months, the case takes a drastic turn on a very dark night when Daniel is shot and left for dead. Resuscitated after twenty minutes of clinical death, Daniel finds himself haunted by the experience. He knows he's seen the killer's face, but the trauma of dying has obscured the memory and left him with crushing panic attacks. Nothing--not even desperate, dangerous attempts to reexperience his own death--seems to bring him closer to finding the killer. Then Eve strikes again, much closer to home. And Daniel's obsession explodes into a battle for his life . . . his sanity . . . his very soul. Enter a world of death and near death that blurs the lines between fiction and reality in a way that will leave you stunned. "The detail is stunning, pointing to meticulous research in FBI methods, forensic medicine, and psychological profiling. We have to keep telling ourselves that this is fiction. At the same time, we can't help thinking that not only could it happen, but that it will happen if we're not careful." David M. Kiely and Christina McKenna, authors of *The Dark Sacrament*
