The EMD 645 is a family of diesel engines that was designed and manufactured by the Electro-Motive Division of General Motors. While the 645 series was intended primarily for locomotive, marine and stationary engine use, one 16-cylinder version powered the 33-19 "Titan" prototype haul truck designed by GM's Terex division.

However, if the engine needed to be restarted, the air boxes had to be primed again and the air pressure had to rise to 13 psi, in order to get the turbos to kick in and produce power. The net result was that the turbos were subsequently modified and the modified engines' operated fine after the modification. Diesel Engine Specs .
