The change number is entered in the basic data. You can use engineering change management to perform the following functions: To link documents to other SAP objects (for example, material, BOM, routing) that are also affected by the change. The valid-from date from the change master record gives a document a time reference.

Engineering Change Management - [help.sap.com](http://help.sap.com)

The standard SAP system supports the effectivity types DATE (date interval) and SERNR (serial number interval) only. Since it is not possible to construct all variants based on effectivity conditions in the standard SAP system, you can create more effectivity types with the parameters you require in Customizing for Engineering Change Management. You can, for example, define the effectivity type AIRLINE (Airline) that has the parameter DEBIT (customer) as a single value.

SAP S/4HANA Change Management: How to Handle the People Side of Your Transformation. Organizational change is a key component of any SAP S/4HANA transformation or implementation of any of the top ERP systems. But too often, organizations limit their scope of change to myopically focus on end-user training. When we are close to the day-to-day details of a digital transformation, we assume that we just need to train people once we figure out the new processes and technologies.
