For a sine or cosine graph, simply go from 0 to 2? on the x-axis, and -1 to 1 on the y-axis, intersecting at the origin (0, 0). {\displaystyle y=\cos (x)} repeat the same shape from negative infinity to positive infinity on the x-axis (you'll generally only graph a portion of it). (x) {\displaystyle y=\sin (x)}.

First, note that the sine and cosine graphs are the same shape — cosine is the same as sine, just slid 90 degrees to the left. Also, notice that their simple wave shape goes as high as 1 and as low as –1, and goes on forever to the left and right, repeating every 360 degrees. That's the period of both functions, 360 degrees.

The graph of y=sin(x) is like a wave that forever oscillates between -1 and 1, in a shape that repeats itself every 2? units. Specifically, this means that the domain of sin(x) is all real numbers, and the range is [-1,1]. See how we find the graph of y=sin(x) using the unit-circle definition of sin(x).

The sine and cosine graphs are almost identical, except the cosine curve starts at `y=1` when `t=0` (whereas the sine curve starts at `y=0`). We say the cosine curve is a sine curve which is shifted to the left by `?/2\ (= 1.57 = 90^@)`.
