Rosalie is a fifteen-year-old girl from Camden, Maine, who is a dreamer and a daring adventurer. When given the opportunity to seize the moment to go on an expedition up the great Mount Megunticook to explore the mysterious Victorian house, she cannot resist. Once inside the house, she finds it holds a magical mystery: one that only her bravery and confidence can solve.

This volume is a thorough introduction to contemporary research in elasticity, and may be used as a working textbook at the graduate level for courses in pure or applied mathematics or in continuum mechanics. It provides a thorough description (with emphasis on the nonlinear aspects) of the two competing mathematical models of three-dimensional elasticity, together with a mathematical analysis of these models. The book is as self-contained as possible.

Dengue continues to pose a threat to public health in our region. This threat has been recognized by countries throughout the region, which have taken action to protect their populations. National leaders also have acknowledged that they must act regionally in order to protect people within their own borders. The Association of Southeast Asian Nations (ASEAN) and the World Health Organization have formed an effective alliance to achieve a shared goal: a healthy and secure population. One clear sign of this cooperation was seen on 15 June 2011. ASEAN Health Ministers declared that day and each subsequent 15 June to be ASEAN Dengue Day. This important annual event allows ASEAN members, in coordination with WHO, to consolidate dengue prevention and control measures. ASEAN Member States ought to be congratulated for marking the successful launch of ASEAN Dengue Day and for affirming the regional partnership needed to address dengue. This book highlights some of the national and regional events that took place on 15 June 2011 to mark the launching of the first ASEAN Dengue Day.
