This is how to set the cam timing for Honda's 50/70cc OHC horizontal engines.

[How To Set Cam Timing - YouTube](#)

Line up the timing marks. Using a wrench or socket on the crankshaft bolt rotate the engine until the timing mark on the crankshaft pulley is aligned with the 0 ° mark on the timing scale. Verify the distributor rotor is aligned with the index mark on the distributor housing indicating the rotor is in position to fire the number one cylinder.

[How to Change a Timing Belt \(with Pictures\) - wikiHow](#)

Ignition timing refers to the point at which the spark plugs ignite the fuel within an engine ' s cylinder. Proper timing is all-important to the thermo-efficiency of the engine. The first thing to keep in mind is that fuel burns at a certain rate in an engine regardless of the rpm.

[Symptoms of Retarded Ignition Timing | It Still Runs](#)

In order to ensure the timing is correct on a mechanical fuel injection pump, first rotate the engine to the top dead center (TDC) and engage the TDC timing pin with the camshaft gear. Then remove the timing pin access plug from the injection pump and verify if the slot in the pin will fit over the timing tooth of the pump.
