The Human Karyotype Analysis Activity enables introductory biology students to use guided inquiry to analyze 6 different human karyotypes. Students will describe the numbered karyotypes on a chart where they match the description of the disorder with the karyotype card. The chart also asks the diso

~~Karyotype Worksheet | Teachers Pay Teachers~~
Description: Students will construct and analyze a karyotype. Students will identify homologous chromosome pairs by their length, centromere position, and banding pattern. Students will determine the sex of an individual from a karyotype. The goals of this lesson are for students to understand how to create a karyotype from a chromosome spread and to be able to analyze a karyotype to determine an individual's sex and health.
