NOT FOR SALE chapter is the indifference curve and its slope, the Marginal Rate of Substitution (MRS). The MRS formalizes the notion of trade-off and is (in principle) measurable. For those reasons it is superior to a "marginal utility" introduction to consumer theory. The definition provided for the MRS in Chapter 2 needs to be approached carefully.

Intermediate Microeconomics with Applications describes the methods and practicality of microeconomics, specifically the actual empirical models. This book is divided into 17 chapters and begins with discussions of the principles and concept of utility, preference, indifference and revenue analysis, demand, and production. The succeeding chapters deal with the production theory, the applications of linear programming, theory of costs, and profits. Other chapters explore the fundamentals of perfect and imperfect competition, the issues of pricing, and decision making under uncertainty. The final chapters discuss some factors of production and marketing, the link between the so-called "general equilibrium and welfare economics, and some economic regulation. This book will be of value to economists and business managers.
