Comprehensive Preparedness Guide (CPG) 101 provides Federal Emergency Management Agency (FEMA) guidance on the fundamentals of planning and developing emergency operations plans (EOP). CPG 101 shows that EOPs are connected to planning efforts in the areas of prevention, protection, response, recovery, and mitigation. Version 2.0 of this Guide expands on these fundamentals and encourages emergency and homeland security managers to engage the whole community in addressing all risks that might impact their jurisdictions. While CPG 101 maintains its link to previous guidance, it also reflects the reality of the current operational planning environment. This Guide integrates key concepts from national preparedness policies and doctrines, as well as lessons learned from disasters, major incidents, national assessments, and grant programs. CPG 101 provides methods for planners to: Conduct community-based planning that engages the whole community by using a planning process that represents the actual population in the community and involves community leaders and the private sector in the planning process; Ensure plans are developed through an analysis of risk; Identify operational assumptions and resource demands; Prioritize plans and planning efforts to support their seamless transition from development to execution for any threat or hazard; Integrate and synchronize efforts across all levels of government. CPG 101 incorporates the following concepts from operational planning research and day-to-day experience: The process of planning is just as important as the resulting document; Plans are not scripts followed to the letter, but are flexible and adaptable to the actual situation; Effective plans convey the goals and objectives of the intended operation and the actions needed to

achieve them. Successful operations occur when organizations know their roles, understand how they fit into the overall plan, and are able to execute the plan. Comprehensive Preparedness Guide (CPG) 101 provides guidelines on developing emergency operations plans (EOP). It promotes a common understanding of the fundamentals of risk-informed planning and decision making to help planners examine a hazard or threat and produce integrated, coordinated, and synchronized plans. The goal of CPG 101 is to make the planning process routine across all phases of emergency management and for all homeland security mission areas. This Guide helps planners at all levels of government in their efforts to develop and maintain viable all-hazards, all-threats EOPs. Accomplished properly, planning provides a methodical way to engage the whole community in thinking through the life cycle of a potential crisis, determining required capabilities, and establishing a framework for roles and responsibilities. It shapes how a community envisions and shares a desired outcome, selects effective ways to achieve it, and communicates expected results. Each jurisdiction's plans must reflect what that community will do to address its specific risks with the unique resources it has or can obtain. Planners achieve unity of purpose through coordination and integration of plans across all levels of government, nongovernmental organizations, the private sector, and individuals and families. This supports the fundamental principle that, in many situations, emergency management and homeland security operations start at the local level and expand to include Federal, state, territorial, tribal, regional, and private sector assets as the affected jurisdiction requires additional resources and capabilities. A shared planning community increases the likelihood of integration and synchronization, makes planning cycles more efficient and effective, and makes plan maintenance easier.

This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This

report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products.

The Future of Children is a new semiannual publication that provides research and analysis to promote effective policies and programs for children. This first issue focuses on "School Readiness: Closing Racial and Ethnic Gaps." For more than 30 years, researchers have seen white children outperform black and other minority children in tests of reading and math skills. Though there is evidence that the gap has narrowed somewhat, the very persistence of this "racial and ethnic gap" remains a source considerable concern for academics, policy professionals and parents. The ethnic and racial gaps appear to reach back to the preschool years. When children reach the school door, minority children exhibit lower school readiness skills, at least those measured by standardized tests, than their white counterparts. From that point forward, the achievement gap only widens. If policy professionals are to address this disparity in academic achievement (and the consequent disparity in later opportunity), the racial and ethnic gap must be examined in the very earliest years, before students begin school with embedded inequalities. This volume critically summarizes the research on the origin and trajectory of the racial and ethnic gap in the early years from several theoretical perspectives. In particular, research is analyzed to determine when these differences start to emerge, in what areas they appear, what factors contribute to their development by the time children enter grade school and what are the long term effects. The Law of Emergencies: Public Health and Disaster Management, Second Edition, introduces the American legal system as it interacts with disaster management, public health and civil unrest issues. Nan Hunter shows how the law in this area plays out in the context of real life emergencies where individuals often have to make split-second decisions. This book covers the major legal principles underlying emergency policy and operations and analyzes legal authority at the federal, state and local levels, placing the issues in historical context but concentrating on contemporary questions. The book includes primary texts, reader-friendly expository explanation and sample discussion questions in each chapter, as well as scenarios for each of the three major areas to put the concepts in to action. Prior knowledge of the law is not necessary in order to use and understand this book, and it satisfies the need of professionals in a wide array of fields related to emergency management to understand both what the law requires and how to analyze issues for which there is no clear legal answer. The book features materials on such critical issues as how to judge the extent of Constitutional

authority for government to intervene in the lives and property of American citizens. At the same time, it also captures bread-and-butter issues such as responder liability and disaster relief methods. No other book brings these components together in a logically organized, step by step fashion. Updated with expanded coverage and several new chapters Re-organized to improve topic focus, with sections covering The President, Congress, and the Courts; Governance on the Ground; The Rights of Individuals; Disaster Management and Reconstruction; Health Emergencies; Preserving the Social Fabric; and Liability Includes a new disaster scenario (a dirty bomb explosion in Washington, DC) to illustrate the application of key concepts Features two new appendices that provide key excerpts from the U.S. Constitution and the Stafford Act Includes a new glossary of legal and legislative terms

This book provides a step-by-step process that focuses on how to develop, practice, and maintain emergency plans that reflect what must be done before, during, and after a disaster, in order to protect people and property. The communities who preplan and mitigate prior to any incident will be better prepared for emergency scenarios. This book will assist those with the tools to address all phases of emergency management. It covers everything from the social and environmental processes that generate hazards, to vulnerability analysis, hazard mitigation, emergency response, and disaster recovery.
