Unlike many lottery methods, this 9-N-Play Pick 3 Pro with 3X3 offers you the reliability, consistency, and stability that is expected of a calendar-based system. Here we use the Gregorian Calendar as our base--hence the name Gregory's Calendar--and let SBIP999 work her magic to turn the dates into "all state" straight winning combinations. Plus, we include our exclusive 3X3 feature which allows you to play just one line of 3 combinations each, or two lines for 6 combination plays, or three lines for 9 combination plays, depending on your budget. Each line will pull its own straight hits, so you do not have to guess which of the 9 combinations you want to play when your money is low, just pick a line and play! Easy...Never be at a lost for what to play in the Pick 3 again. Just 3, 6, or 9 hot monthly combinations to focus on each month. Remember, this system is maximized for "all states" online players, not single state players. And you get combinations for each month of this year, beginning in April 2012, through the month of June 2013! That's fifteen months of play for the price of twelve. So whether you want to play just 3 combinations or all 9, your straight and box hits are on the way! P.S. By the way, you might like to know that for the month of March 2012, this 9 N Play Pick 3 Pro Polar Bear Stretch method produced 17 straight "all state" hits, and 82 box hits; in April it was 23 straight hits and 68 box hits total. Of course past performance is no predictor of future performance, but the calendar rarely lies. Released in late May, you can get this book at our low introductory price, making this lottery system a steal by anyone's definition. But even better than that is getting legitimate wins with little to no effort on your part. Hey, why spend hours on daily "workouts" when you can get a proven system, and let our Polar Bear do all the heavy lifting. Grab your risk-free copy today...

The Second Edition of Qualitative Online Interviews by Janet Salmons provides researchers the guidance they need to extend the reach of their studies beyond physical boundaries. Focusing on designing, conducting, and assessing data drawn from online interviews as well as from observations, materials, and artifacts collected online, the book emphasizes the use of in-depth interviews in qualitative research or mixed-methods designs. Written in an easy-to-read manner, the thorough Second Edition offers the practical information and scholarly foundations needed to make thoughtful decisions in technology-infused research.

When he arrives there, Santa offers him any gift he desires. The boy modestly asks for one bell from the reindeer's harness. It turns out to be a very special gift, for only believers in Santa can hear it ring. "Magical glowing double spread pictures . . . an original and memorable book." - Guardian "Evocative, realist pastels and atmospheric text." - Sunday Times "A thrilling tale." - Independent
