Lonely because he is the only mouse in the church, Arthur asks all the town mice to join him. Unfortunately the congregation aren't so welcoming. But all is not lost when a robber tries to steal the church candlesticks, the mice foil his plans and win back their home.

If you can build websites with CSS and JavaScript, this book takes you to the next level—creating dynamic, database-driven websites with PHP and MySQL. Learn how to build a database, manage your content, and interact with users. With step-by-step tutorials, this completely revised edition gets you started with expanded coverage of the basics and takes you deeper into the world of server-side programming. The important stuff you need to know: Get up to speed quickly. Learn how to install PHP and MySQL, and get them running on both your computer and a remote server. Gain new techniques. Take advantage of the all-new chapter on integrating PHP with HTML web pages. Manage your content. Use the file system to access user data, including images and other binary files. Make it dynamic. Create pages that change with each new viewing. Build a good database. Use MySQL to store user information and other data. Keep your site working. Master the tools for fixing things that go wrong. Control operations. Create an administrative interface to oversee your site.

Fibre metal laminates were developed at Delft University of Technology in The Netherlands, from the beginning of the 1980s. This is a new family of hybrid materials consisting of thin metal layers bonded together by fibres embedded in an adhesive. As a result of this build-up, fibre metal laminates possess a mixture of the characteristics of both metals and composite materials. Initial development led to the 'Aral' variant using aramid fibres, which was first applied on the C-17 military transport aircraft around 1990. Large-scale application became possible with a variant using glass fibres, dubbed 'Glare', which was selected for the Airbus A380 super jumbo in 2001. This is the first book to discuss these new materials and it deals mostly with Glare. It covers most of the relevant aspects of the materials, from static mechanical properties, fatigue and impact to design, production and maintenance of aircraft structures. This book contains the basic information on these new materials necessary for engineers and aircraft operators alike.

Hundreds of exercises to get you to the next level Collins Work on your Grammar - Pre-Intermediate (A2) is a new practice book that covers the key grammar points needed by learners of English at Pre-Intermediate level (CEF level A2). This book is an essential resource for learners who want to improve their English grammar. Each of the 30 units presents a different area of grammar using clear language and examples. This is followed by practice exercises to ensure the learner will remember and be able to use what they have learnt with confidence in their written and spoken English. The grammar covered in Collins Work on your Grammar - Pre-Intermediate (A2) has been carefully selected based on Collins Corpus research and the experience of our language experts. As a result, this book provides plenty of useful practice with authentic, up-to-date examples of language usage in context. A carefully structured layout and simple illustrations make sure the language is always clear and the book is easy to navigate. Collins Work on your Grammar - Pre-Intermediate (A2) is ideal for self-study or for use in the classroom, and is an essential resource for students and teachers. \* Focuses on the grammar required at Pre-Intermediate level (CEf level A2) \* Thirty units with clear presentation material followed by practice exercises \* Authentic examples of real English, taken from the Collins Corpus \* Includes line drawings which illustrate key concepts \* Clear structure and presentation of language \* Plenty of room to write in \* Full answer key included \* Ideal for self-study or for use in the classroom

Composite materials, with their higher exposure to dynamic loads, have increasingly been used in aerospace, naval, automotive, sports and other sectors over the last few decades. Dynamic Deformation, Damage and Fracture in Composite Materials and Structures reviews various aspects of dynamic deformation, damage and fracture, mostly in composite laminates and sandwich structures, in a broad range of application fields including aerospace, automotive, defense and sports engineering. As the mechanical behavior and performance of composites varies under different dynamic loading regimes and velocities, the book is divided into sections that examine the different loading regimes and velocities. Part one examine low-velocity loading and part two looks at high-velocity loading. Part three then assesses shock and blast (i.e. contactless) events and the final part focuses on impact (contact) events. As sports applications of composites are linked to a specific subset of dynamic loading regimes, these applications are reviewed in the final part. Examines dynamic deformation and fracture of composite materials Covers experimental, analytical and numerical aspects Addresses important application areas such as aerospace, automotive, wind energy and defence, with a special section on sport applications

The wildly inventive debut collection of stories by the Oscar-nominated star of *The Social Network*. “Hilarious . . . It’s a hoot” (People, The Best New Books). Jesse Eisenberg, known for his iconic film roles, his regular pieces in the *New Yorker* and two critically acclaimed plays, proves himself “a deeply original comic voice” in these 28 stories” about the funniness, sadness, and strangeness of everyday life and they really made me laugh” (Roz Chast). Moving from contemporary LA to the dorm rooms of an American college to ancient Pompeii, Eisenberg throws the reader into a universe of social misfits, reimagined scenes from history, and ridiculous overreactions; a college freshman forced to live with a roommate is stunned when one of her ramen packets goes missing (“She didn’t have ‘one’ of my ramens. She had a chicken ramen.”); Alexander Graham Bell has teething problems with his invention (“I’ve been calling Mabel all day, she doesn’t pick up! Yes, of course I dialed the right number—2!”); and in the title story, a precocious and privileged nine-year-old boy finds himself in the uncomfortable position as an amateur restaurant critic. Featuring illustrations by award-winning cartoonist Jean Jillian, this “alphabet soup of sketches, riffs, and innovations” (Seattle Times) explores the various insanities of the modern world, “playfully bringing both familiar and wholly original scenarios to life” (Marie Claire).
