Online Library On The Threshold Of Transformation

Every banking crisis, whatever its particular circumstances, has two features in common with every previous one. Each has been preceded by a period of excessive monetary ease, and by ill thought out regulatory changes. For many the recent

Online Library On The

hiatus in inter-bank
lending has been
seen as a blip -
enormous in size and
global in scope, but,
nonetheless, a blip.
Finance at the
Threshold offers a
unique perspective
from an English
economic and
monetary historian. In
it the author asks:
Why did the banks

Online Library On The

stop lending to one another, and why now? Was it merely a matter of over-loose credit due to the relaxation of traditional prudence, or did global finance find itself at its limits? Have government bail-outs saved the day or merely postponed the problem? Christopher Houghton Budd offers

Online Library On The

a radical view of the global financial crisis, spanning a wide gamut of current thinking. He argues that we need, above all, to overcome the left-right divide so much taken for granted today, and promote financial literacy to young people. His contribution to the

Online Library On The

Transformation and
Innovation Series
claims that global
finance has brought
us to the limits of what
mechanistic economic
explanations can
capture. New ideas
and above all new
instruments are
needed so that
innovation can shift
from its dexterous
exploitation of

Online Library On The

inefficiencies and turn
its attention instead to
fresh initiative.

Finance at the
Threshold is essential
reading for academics
and practitioners
concerned with
financial and
economic policy and
needing to develop a
sense of the history
thus understanding
the forward prospects

humanity? This volume explores in a global overview the archaeology of the Middle Pleistocene, 800,000 to 130,000 years ago when evidence for innovative cultural behaviour appeared. The evidence shows that the threshold was crossed slowly, by a variety of human

ancestors, and was not confined to one part of the Old World. Crossing the Human Threshold examines the changing evidence during this period for the use of place, landscape and technology. It focuses on the emergence of persistent places, and associated developments in tool

The impacts of climate change are already being felt. Learning how to live with these impacts is a priority for human development. In this context, it is too easy to see adaptation as a narrowly defensive task – protecting core assets or functions

Online Library On The

from the risks of
climate change. A
more profound
engagement, which
sees climate change
risks as a product and
driver of social as well
as natural systems,
and their interaction,
is called for.

Adaptation to Climate
Change argues that,
without care, adaptive
actions can deny the

Online Library On The

deeper political and cultural roots that call for significant change in social and political relations if human vulnerability to climate change associated risk is to be reduced.

This book presents a framework for making sense of the range of choices facing humanity, structured around resilience

Online Library On The

(stability), transition (incremental social change and the exercising of existing rights) and transformation (new rights claims and changes in political regimes). The resilience-transition-transformation framework is supported by three detailed case study

threshold. These also illustrate the diversity of contexts where adaptation is unfolding, from organizations to urban governance and the national polity. This text is the first comprehensive analysis of the social dimensions to climate change adaptation. Clearly written in an engaging style, it
