When you have worked in the real estate industry or property management field, you need to see "pictures" of resumes from others with similar backgrounds. (How much does it help you to look at resumes of nurses, CEOs, or teachers when you come to change fields or seek employment?) At last there is a book of resumes and cover letters tailored to your needs. See how professionals like you have shown their credentials and how they have used the specialized lingo of your field. This is YOUR resume book, written especially for you, if your background includes experience in real estate or property

management -- or if you are trying to enter those fields for the first time. A book written just for you, by one of the most knowledgeable writers and editors who has specialized in helping job hunters.

This major new reference work, in an easy-to-use A-Z format, covers all aspects of facilities and property strategy, administration and control, backed up by a wealth of practical suggestions. All businesses are in effect "in property" but only a minority manage their property efficiently. The Royal Institute of Chartered Surveyors recently stated that British industry is "throwing away £18 billion every year" through inefficient control and use of its property assets. In addition to the pressing need to improve the management of property assets, there is now a growing body of new legislation covering waste, energy consumption and reduction and a host of environmental issues all of which place an increasing burden on the facilities and property professional. With 64 separate entries arranged in an accessible expanded index format, the reader is able to focus on each particular subject and to find answers to problems quickly and efficiently. Valuable recent case studies add helpful further background and the work includes checklists and sample forms throughout. Like all of David Martin's books, this is clear, concise and concentrates on what needs to be done in practice. It covers every aspect of facilities administration, budgetary and expenditure control and property administration, from accommodation planning, acquisition, building works and condition survey through dilapidations, environmental considerations, health and safety and insurance to maintenance, outsourcing, privity of contract, rating, security, underletting, VAT, waste and zoning and much more.

It is important for those studying and practicing in real estate and property management to learn to manage property assets effectively, to be able to provide their companies with effective property and facilities solutions. This book raises the awareness of how real estate management can support business, transform the workplace and impact upon people and productivity, ensuring that costs are minimized and profit maximized. Written for advanced undergraduate students on property related courses, it provides them with a rounded understanding by aligning the subject with estates management, facilities management and business strategy. Case studies and action plans provide real insight and make this book an essential reference for those at the start of their careers in real estate and facilities management.

I wrote this book because I feel that housekeeping is more than a daily chore. I believe that our attitudes and beliefs about housekeeping come from deep

within and from our past. These attitudes have a surprising influence on our very existence. Like any chore, housekeeping can be streamlined and simplified, but a clean house will not bring total satisfaction into our lives. If we understand why we are the kind of housekeeper we have become, discover where we got our beliefs and why we have them, we can find freedom. A freedom that can release us from the "Black Clouds" that shadow us and sometimes even affect our happiness. I would like to share some ideas with you about housekeeping and help you learn things about yourself that you may never knew existed. This book is for all housekeepers male and female. It is for the perfectionist to the most relaxed of housekeepers. I will take you through some exercises that will reveal why you clean or do not clean the way you do. I will also take you through cleaning a house, step by step, and show you how to rid yourself of "Spring and Fall Cleaning" and the guilt that you no longer do it. You will learn what type of housekeeper you are and how to live happily with that discovery. I suggest that you read the book in its entirety, before you began cleaning. Then read and re-read as needed.
