SHORTLISTED FOR BEST NON-FICTION BOOK BY A PARLIAMENTARIAN AT THE PARLIAMENTARY BOOK AWARDS 2021 'Read this book!' Caroline Lucas 'My money's on Magid.' Thandie Newton "Thou shalt not ignore this book. Magid is magic!" - Jarvis Cocker 'A man so inspiring you will have no choice but to cast your hopeless lethargy asunder' - Rufus Hound A guide to being courageous and community-minded, and to disrupting and dismantling age-old power structures in work, life and politics, written by someone who has done exactly that. Let's be honest. Magid Magid's story seems an unlikely one. He's a Somali-born black Muslim refugee who became the youngest ever Lord Mayor of Sheffield and one of the last UK MEPs. Magid has made headlines nationally and internationally for his creative ways of campaigning while not conforming to tradition and being unapologetically himself. Magid had no idea that the poster he dreamed up for a local music festival in 2018 would go viral. The poster contained the 10 commandments he tries to live by. He had no idea that this poster would come to represent a movement that has swept him to the heart of local and European establishment politics. Now, for the first time, he reveals the stories behind each of these 'commandments'; what drives him, the obstacles he overcame and what makes him hopeful. 'His voice and representation are inspirational and a force to reckon with.' Dr Shola Mos-Shogbamimu, lawyer, activist and author 'It's easy to problematise

the world, but Magid has offered us answers , solutions and even the possibility of a new politics.' Jon McClure, lead singer of Reverend and The Makers 'Magid's book could not be more timely. A must read for anyone who wants to change the world.' Chunky Mark, The Artist Taxi Driver

Finally, a book that crosses the great divide between academia and practice a rare feat, especially in edited volumes with scholarly contributions. . . there is much to like about what the book does cover. Wayne Visser, Ethical Performance Mallin brings together academics and business experts to share a wide range of accounts from across the globe. Readers will find insights and guidance on how countries and companies have tried to balance the perceived needs of often disparate groups. James McRitchie, CorpGov.net Chris Mallin has put together a fine volume providing detailed insights into the global spread of CSR. It wonderfully showcases the diversity and dynamics of CSR in different countries, regions and key industries. It is an essential read for everybody interested in the dialectics of global homogenization and local adaptation of CSR-related management practices. Dirk Matten, York University, Toronto, Canada Professor Mallin has edited a remarkable range of studies, illustrating how companies across the world regard and respond to their social

responsibilities. Her book will prove an invaluable source of information for everyone interested in comparative corporate social responsibility, aided by the admirable learning points and questions following each case study. It will also be turned to for guidance by investors concerned to promote corporate social values internationally. Sir Adrian Cadbury, Aston University Business School, Birmingham, UK Corporate Social Responsibility (CSR) is an area of increasing global interest with companies taking CSR issues more seriously, devoting more resources to such issues and acknowledging the benefits of CSR activities. This insightful book provides a comprehensive analysis of the development of CSR in a diverse range of countries including the UK, Italy, Poland, Turkey, the USA, the Middle East, Australia, Japan and Korea. Christine Mallin has brought together leading experts from both academia and the business world to provide fully up-to-date accounts of developments in CSR from a range of legal, cultural and economic perspectives. This timely resource will serve as an invaluable teaching and resource tool for advanced students and academics and will provide insights and guidance to the wider business community.

Research on executive compensation has exploded in recent years, and this volume of specially commissioned essays brings the reader up-to-

Read Book Silvia Carta

date on all of the latest developments in the field. Leading corporate governance scholars from a range of countries set out their views on four main areas of executive compensation: the history and theory of executive compensation, the structure of executive pay, corporate governance and executive compensation, and international perspectives on executive pay. The authors analyze the two dominant theoretical approaches – managerial power theory and optimal contracting theory – and examine their impact on executive pay levels and the practices of concentrated and dispersed share ownership in corporations. The effectiveness of government regulation of executive pay and international executive pay practices in Australia, the US, Europe, China, India and Japan are also discussed. A timely study of a controversial topic, the Handbook will be an essential resource for students, scholars and practitioners of law, finance, business and accounting.

responsibility for group-related risks of violence against women and girls. In doing so, it reassesses the concept of femicide, analysing it in view of the crime of genocide, crimes against humanity, war crimes, as well as several facets of human rights.

Big Data, Code and the Discrete City explores how digital technologies is gradually changing the way in which the public space is designed by architects, managed by policy-makers, and experienced by individuals. Smart city technologies are superseding the traditional human experience that has characterised the making of the public space until today. This book examines how computers see the public space and the effect of algorithms, artificial intelligences, and automated processes on the human experience in public spaces. Divided into three parts, the first part of this book examines the notion of discreteness in its origins and applications to computer sciences. The second section presents a dual perspective: it explores the ways in which public spaces are constructed by the computer-driven logic and then translated into control mechanisms, design strategies, and software-aided design. This perspective also describes the way in which individuals perceive this new public space, through its digital logic, and discrete mechanism (from WI-FI coverage to self-tracking). Finally, in the third part, this book scrutinises the discrete logic

Machine Learning and the City Explore the applications of machine learning and artificial intelligence to the built environment Machine Learning and the City: Applications in Architecture and Urban Design delivers a robust exploration of machine learning (ML) and artificial intelligence (AI) in the context of the built environment. Relevant contributions from leading scholars in their respective fields describe the ideas and techniques that underpin ML and AI, how to begin using ML and AI in urban design, and the likely impact of ML and AI on the future of city design and planning. Each section couples theoretical and technical chapters, authoritative references, and concrete examples and projects that illustrate the efficacy and power of machine learning in urban design. The book also includes: An introduction to the probabilistic logic that underpins machine learning Comprehensive explorations of the applications of machine learning and artificial intelligence to urban environments Practical discussions of the consequences of applied machine learning and the future of urban design Perfect for designers approaching machine

learning and AI for the first time, *Machine Learning and the City: Applications in Architecture and Urban Design* will also earn a place in the libraries of urban planners and engineers involved in urban design.

Increasingly the world around us is becoming 'smart.' From smart meters to smart production, from smart surfaces to smart grids, from smart phones to smart citizens. 'Smart' has become the catch-all term to indicate the advent of a charged technological shift that has been propelled by the promise of safer, more convenient and more efficient forms of living. Most architects, designers, planners and politicians seem to agree that the smart transition of cities and buildings is in full swing and inevitable. However, beyond comfort, safety and efficiency, how can 'smart design and technologies' assist to address current and future challenges of architecture and urbanism?

Architecture and the Smart City provides an architectural perspective on the emergence of the smart city and offers a wide collection of resources for developing a better understanding of how smart architecture, smart cities and smart systems in the built environment are discussed, designed and materialized. It brings together a range of international thinkers and practitioners to discuss smart systems through four thematic sections: 'Histories and Futures', 'Agency and

Read Book Silvia Carta

Control', 'Materialities and Spaces' and 'Networks and Nodes'. Combined, these four thematic sections provide different perspectives into some of the most pressing issues with smart systems in the built environment. The book tackles questions related to the future of architecture and urbanism, lessons learned from global case studies and challenges related to interdisciplinary research, and critically examines what the future of buildings and cities will look like.

An illustrated history, exploration, and celebration of the Italian liqueur everyone loves. This gorgeous guide teaches you everything you need to know about amaro, the delightfully complex and bittersweet Italian liqueur. Traditionally a digestif, it's also a popular ingredient in modern cocktails. The first part of the book is dedicated to the drink's creation and extraction processes, both traditional and contemporary. The second is a complete history of the beverage, from its origins in medieval alchemy to today's popular renaissance. Further chapters explore the liqueur's botanical profiles and natural properties, followed by a thorough buying guide with descriptions of bottles from Italy, Europe, and beyond. Finally, Zed showcases how best to use amaro behind the bar and in the kitchen, with recipes such as The Golden Mai Tai and Bitter Goat Cheese Risotto. A lovingly crafted tribute to a celebrated drink, The Big
