As America's most dysfunctional big city, Detroit faces urban decay, population losses, fractured neighborhoods with impoverished households, an uneducated, unskilled workforce, too few jobs, a shrinking tax base, budgetary shortfalls, and inadequate public schools. Looking to the city's future, Lewis D. Solomon focuses on pathways to revitalizing Detroit, while offering a cautiously optimistic viewpoint. Solomon urges an economic development strategy, one anchored in Detroit balancing its municipal and public school district's budgets, improving the academic performance of its public schools, rebuilding its tax base, and looking to the private sector to create jobs. He advocates an overlapping, tripartite political economy, one that builds on the foundation of an appropriately sized public sector and a for-profit private sector, with the latter fueling economic growth. Although he acknowledges that Detroit faces a long road to implementation, Solomon sketches a vision of a revitalized economic sector based on two key assets: vacant land and an unskilled labor force. The book is divided into four distinct parts. The first provides background and context, with a brief overview of the city's numerous challenges. The second examines Detroit's immediate efforts to overcome its fiscal crisis. It proposes ways Detroit can be put on the path to financial stability and sustainability. The third considers how Detroit can implement a new approach to job creation, one focused on the for-profit private sector, not the public sector. In the fourth and final part, Solomon argues that residents should pursue a strategy based on the actions of individuals and community groups rather than looking to large-scale projects.

Across the US, cities and metropolitan areas are facing huge economic and competitive challenges that Washington won't, or can't, solve. The good news is that networks of metropolitan leaders - mayors, business and labor leaders, educators, and philanthropists - are stepping up and powering the nation forward. These state and local leaders are doing the hard work to grow more jobs and make their communities more prosperous, and they're investing in infrastructure, making manufacturing a priority, and equipping workers with the skills they need. In The Metropolitan Revolution, Bruce Katz and Jennifer Bradley highlight success stories and the people behind them. · New York City: Efforts are under way to diversify the city's vast economy · Portland: Is selling the "sustainability" solutions it has perfected to other cities around the world · Northeast Ohio: Groups are using industrial-age skills to invent new twenty-first-century materials, tools, and processes · Houston: Modern settlement house helps immigrants climb the employment ladder · Miami: Innovators are forging strong ties with Brazil and other nations · Denver and Los Angeles: Leaders are breaking political barriers and building world-class metropolises · Boston and Detroit: Innovation districts are hatching ideas to power these economies for the next century The lessons in this book can help other cities meet their challenges. Change is happening, and every community in the country can benefit. Change happens where we live, and if leaders won't do it, citizens should demand it. The Metropolitan Revolution was the 2013 Foreword Reviews Bronze winner for Political Science.
