Students are already strategists in their personal lives. This concise text, intended primarily for undergraduate seniors and MBA students, provides students with the know-how to apply effective strategies in their future careers. Strategic Management: Logic and Action provides a wide range of organizational examples along with worksheets at the end of each chapter. Students are encouraged to use the Web as a source of information, but to also interview people to assess actions within the context of organizations. The text is meant to be a useful guide for strategists facing new situations from the beginning of their organization careers. From the Preface:

"Strategy is no longer the exclusive concern of generals. It is not something you wait to think about until you are the president of an organization. You need to understand strategic thinking right now, as a graduate entering the workforce, a newly appointed supervisor, or a mid-level manager. Corporations, small businesses, non-profits, and public agencies - organizations of all kinds - are discovering how important it is for employees to understand why the organization interacts the way it does with customers, competitors, and other actors. Many then ask their employees to help strengthen current connections and invent new ones."

Introduce your students to strategic management with the market-leading text that sets the standard for the course area. Written by respected scholars who have taught strategic management at all educational levels, Hitt, Ireland, and Hoskisson's latest edition provides an intellectually rich, yet thoroughly practical, analysis of strategic management. The classic industrial organization model is combined with a resource-based view of the firm to provide students with a complete understanding of how today's businesses establish competitive advantages and create value for stakeholders. Cutting-edge research is presented with a strong global focus, featuring more than 500 emerging and established companies. All-new

This work shows how the various elements of consumer analysis fit together in an integrated framework, called the Wheel of Consumer Analysis. Psychological, social and behavioural theories are shown as useful for understanding consumers and developing more effective marketing strategies. The aim is to enable students to develop skills in analyzing consumers from a marketing management perspective and in using this knowledge to develop and evaluate marketing strategies. The text identifies three groups of concepts - affect and cognition, behaviour and the environment - and shows how these they influence each other as well as marketing strategy. The focus of the text is managerial, with a distinctive emphasis on strategic issues and problems. Cases and questions are included in each chapter.

Are all film stars linked to Kevin Bacon? Why do the stock markets rise and fall sharply on the strength of a vague rumour? How does gossip spread so quickly? Are we all related through six degrees of separation? There is a growing awareness of the complex networks that pervade modern society. We see them in the rapid growth of the Internet, the ease of global communication, the swift spread of news and information, and in the way epidemics and financial crises develop with startling speed and intensity. This introductory book on the new science of networks takes an interdisciplinary approach, using economics, sociology, computing, information science and applied mathematics to address fundamental questions about the links that connect us, and the ways that our decisions can have consequences for others.
