Problem: How will the COBOL-DB2 program behave when there is a mismatch between the host variable

*Page 24/39*

# Download File PDF Structured Programming

With number of columns in the  
SELECT statement? Solution. In case  
there is a mismatch in the number of  
columns and number of host variables,  
the query will fail. For example, if we  
have used the below query in a  
COBOL-DB2 program which  
processes the ORDERS DB2 table.
