This book features the manuscripts accepted for the Special Issue “Applications in Electronics Pervading Industry, Environment and Society—Sensing Systems and Pervasive Intelligence” of the MDPI journal Sensors. Most of the papers come from a selection of the best papers of the 2019 edition of the “Applications in Electronics Pervading Industry, Environment and Society” (APPLEPIES) Conference, which was held in November 2019. All these papers have been significantly enhanced with novel experimental results. The papers give an overview of the trends in research and development activities concerning the pervasive application of electronics in industry, the environment, and society. The focus of these papers is on cyber physical systems (CPS), with research proposals for new sensor acquisition and ADC (analog to digital converter) methods, high-speed communication systems, cybersecurity, big data management, and data processing including emerging machine learning techniques. Physical implementation aspects are discussed as well as the trade-off found between functional performance and hardware/system costs.

MoWuKnuffels? After the painful death of my well travelled dog Wuschel, a new member joined our small family. We fostered Wurschtel from an animal shelter and he explored a part of the wide world for the first time on this journey. This made him so enthusiastic that he wanted to tell all his friends at home about his experiences. He shifted to writing letters. But if the events exceeded his horizon of experience, his mistress Monika intervened helpfully with additions. The ten year old dog Knuffi endured with calmness the many ups and downs of a long motorhome journey. After all, she had already accompanied her owner to Canada, Mexico and the USA. So, she was not easily impressed. In his diary, Wurschtel describes his daily experiences con-tinuously and comprehensively, and with his own sense of humor he reflects on the host country and the people he met.
