"One of the genuine masterpieces of sci-fi." – R. D. Mullen In this satirical and enduringly relevant work of science fiction, the acclaimed Czech author Karel Čapek offers a prescient fable of the benefits and dangers of atomic power. Originally published in 1922, the story is set in a then-futuristic Czechoslovakia of 1943, in which an inventor develops the Karburator, a device with the potential to provide abundant low-cost energy. But the reactor's exciting possibilities are shadowed by its dangerous side effect: instead of carbon dioxide, it emits the Absolute, a spiritual essence that inspires a powerful religious fervor. Greed triumphs over ethics as the inventor and his business partner proceed with mass production of the Karburator, resulting in simmering religious strife that ignites a

world war. Karel Čapek is best known for popularizing the term "robot" in his play R.U.R., a seminal work of science fiction in which the robots are metaphors for a world dehumanized by social organization and technology. He offers another strikingly foresighted vision in *The Absolute at Large*, written decades before global warming awareness yet predicting the catastrophic consequences of the unchecked pursuit of profit by business and industry.

*The Absolute at Large* by Karel Capek This volume contains Karel Capek's novel "The Absolute at Large. It is a science fiction novel that centres round the discovery of a mysterious new source of energy that utterly transforms society as we know it. It was hailed by R. D. Mullen as "one of the genuine masterpieces of Science Fiction". This volume is highly recommended for fans of vintage science fiction, and it constitutes a veritable must read for fans of Capek's seminal work. Karel Capek was a Czech writer during the early twentieth century, who famously coined the term 'robot' in his 1920 play "R.U.R.". Many vintage texts such as this are increasingly scarce and expensive, and it is with this in mind that we are republishing this book now, in an affordable, high quality, modern edition. It comes complete with a specially commissioned biography of the author. We are delighted to publish this classic book as part of our extensive Classic Library

collection. Many of the books in our collection have been out of print for decades, and therefore have not been accessible to the general public. The aim of our publishing program is to facilitate rapid access to this vast reservoir of literature, and our view is that this is a significant literary work, which deserves to be brought back into print after many decades. The contents of the vast majority of titles in the Classic Library have been scanned from the original works. To ensure a high quality product, each title has been meticulously hand curated by our staff. Our philosophy has been guided by a desire to provide the reader with a book that is as close as possible to ownership of the original work. We hope that you will enjoy this wonderful classic work, and that for you it becomes an enriching experience.

Welcome to the Essential Novelists book series, where we present to you the best works of remarkable authors. For this book, the literary critic August Nemo has chosen the two most important and meaningful novels of Karel Capek which are The Absolute at Large and The War with

the Newts. Karel Capek was a Czech writer, playwright and critic. He has become best known for his science fiction, including his novel War with the Newts and play R.U.R., which introduced the word robot. He also wrote many politically charged works dealing with the social turmoil of his time. Influenced by American pragmatic liberalism, he campaigned in favor of free expression and strongly opposed the rise of both fascism and communism in Europe. Novels selected for this book: - The Absolute at Large - The War with the Newts This is one of many books in the series Essential Novelists. If you liked this book, look for the other titles in the series, we are sure you will like some of the authors.

Playful and provocative, irreverent and inspiring, Capek is perhaps the best-loved Czech writer of all time. Novelist and playwright, famed for inventing the word 'robot' in his play RUR, Capek was a vital part of the burgeoning artistic scene of Czechoslovakia of the 1920s and 30s. But it is in his journalism - his brief, sparky and delightful columns - that Capek can be found at his most succinct, direct and appealing. This selection of Capek's writing, translated into English for the first time, contains his essential ideas. The pieces are animated by his passion for the ordinary and the everyday - from laundry to toothache, from cats to cleaning windows - his love of

language, his lyrical observations of the world and above all his humanism, his belief in people. His letters to his wife Olga, also published here, are extraordinarily moving and beautifully distinct from his other writings. Uplifting, enjoyable and endlessly wise, Believe in People is a collection to treasure.

In this satirical classic, a brilliant scientist invents the Karburator, a reactor that can create abundant and practically free energy. However, the Karburator's superefficient energy production also yields a powerful by-product. The machine works by completely annihilating matter and in so doing releases the Absolute, the spiritual essence held within all matter, into the world. Infected by the heady, pure Absolute, the world's population becomes consumed with religious and national fervor, the effects of which ultimately cause a devastating global war. Set in the mid-twentieth century, The Absolute at Large questions the ethics and rampant spread of power, mass production, and atomic weapons that Karel Čapek saw in the technological and political revolutions occurring around him.

Welcome to the Essential Science Fiction Novels book series, where you
