USA TODAY bestselling author Julia London, "a gifted and versatile author" (Publishers Weekly), introduces a sexy, wildly romantic and emotionally charged new trilogy in which three aristocratic young ladies, upon discovering they are destitute, resort to desperate means to keep up appearances...and find the husbands of their dreams. When the young ladies of the Fairchild family learn that their stepfather has absconded with their late mother's fortune, Ava, the eldest, hunts down the notoriously wealthy rakehell Jared Broderick, the Marquis of Middleton and heir to a dukedom. Much to her shock and delight, the marquis sweeps her into a whirlwind romance and proposes marriage. But after their passionate wedding night, Ava discovers Jared has ulterior motives of his own. Not only does he expect her to deliver an heir while he continues to enjoy a rogue's life, but Ava also suspects she is a pawn in her husband's quest for revenge. Marriages of convenience work for some, but for Ava a loveless bond won't do. So she devises a bold plan to confront her husband's demons so that he might be free to choose to give her his heart for the right reason: because she is the only woman he will ever truly desire. From a "USA Today" bestselling author comes the first novel in a sexy, humorous new Regency-era trilogy about three aristocratic sisters who resort to desperate means to keep up appearances when they are left destitute by their stepfather. "Animal Ethics in Context is an intensively researched, carefully structured intervention in ongoing debates about animals and ethics by a scholar with an impressive grasp of the literature."~Alice Crary, New School for Social Research It is widely agreed that because animals feel pain we should not make them suffer gratuitously. Some ethical theories go even further: because of the capacities that they possess, animals have the right not to be harmed or killed. These views concern what not to do to animals, but we also face questions about when we should, and should not, assist animals that are hungry or distressed. Should we feed a starving stray kitten? And if so, does this commit us, if we are to be consistent, to feeding wild animals during a hard winter? In this controversial book, Clare Palmer advances a theory that claims, with respect to assisting animals, that what is owed to one is not necessarily owed to all, even if animals share similar psychological capacities. Context, history, and relation can be critical ethical factors. If animals live independently in the wild, their fate is not any of our moral business. Yet if humans create dependent animals, or destroy their habitats, we may have a responsibility to assist them. Such arguments are familiar in human cases~we think that parents have special obligations to their children, for example, or that some groups owe reparations to others. Palmer develops such relational concerns in- the context of wild animals, domesticated animals, and urban scavengers, arguing that different contexts can create different moral relationships.

This book deals with problems facing children and youth in African cities today. African populations have high growth rates and, consequently, relatively high proportions of young people. Population growth in rural areas has stretched resources leading to urban migration and a rapid growth of cities. Economies have not grown space with the population; and in some countries, economies have even shrunk. The result is a severe lack of resources in cities to meet the needs of the growing populations, shown in high unemployment, inadequate housing, poor services, and often extreme poverty. All the essays in this book draw attention to such urban environments, in which children and youth have to live and survive. The title of this book speaks of negotiating livelihoods. The concept of 'livelihood' has been adopted to incorporate the social and physical environment together with people's responses to it. It considers not only material, but also human and social resources, including local knowledge and understanding. It, thus, considers the material means for living in a broader context of social and cultural interpretation. It, therefore, does not deal only with material and economic existence, but also with leisure activities, entertainments and other social forms of life developed by young people in response to the dictates of the environment. The book contains country-specific case studies of the problems faced by youths in many African cities, how they develop means to solve them, and the various creative ways through which they improve their status, both economically and socially, in the different urban spaces. It recognizes the potentials of young people in taking control of their lives within the constraints imposed upon them by the society. This book is a valuable contribution to the field of child and youth development, and a useful tool for parents, teachers, academics, researchers as well as government and non government development agencies.

Perfectly situated on the eastern seaboard between the Chesapeake Bay to the west and the Delaware River, Delaware Bay, and Atlantic Ocean to the east, Delaware has proven to be a hunting paradise for local sportsmen. For centuries, outdoorsmen and outdoorswomen have harvested the natural riches offered by the wild game that inhabit Delaware's deciduous forests, salt and freshwater marshes, and cultivated crop fields. Common game, such as white-tailed deer, Canada geese, and varied species of ducks have been targeted by the majority of Delaware hunters, but woodcock, quail, snow geese, crows, squirrels, and rabbits are also plentiful in Delaware and provide Delaware sportsmen with hours of hunting enjoyment each season. Join Delawarean Steven Kendus as he uses his hunting wisdom, experience, and research to preserve Delaware's hunting legacy by sharing important history, tactics, locations, tips, and tricks associated with Delaware hunting.

On the Hunt is the story of deer-hunting in Wisconsin, from the spear-throwing Paleo-Indians to the sportsmen of today. Meticulously researched by one of the state's most prolific outdoor writers, On the Hunt covers subsistence and sport hunting, deer camps, changing deer management policies, and recent developments and controversies, from human encroachment on deer habitat to CWD. Range maps and charts tracking annual herd populations and harvest goals complement Willging's engaging storytelling. Drawing from Department of Conservation papers, hunting magazines, newspapers, historic photos of classic deer camps, and the personal stories of hunters and deer managers, On the Hunt offers a fascinating glimpse into a distant and not-so-distant past, when the hunt joined men in almost mythical unity and bucks were seemingly larger than life. An ardent sportsman with nearly 25 years of hunting experience, Willging understands that deer-hunting is as much about the smell of the woods in autumn and the meticulous cleaning of a fine rifle as it is about bringing home a whitetail. His story of how Wisconsin's own World War II flying ace, Richard Bong, squeezed in a few days of hunting while home on leave vividly illustrates the sport's powerful pull on hearts and minds. Willging also engagingly conveys the important tradition of the deer-hunting camp, from a humble two-man shack in Chequamegon National Forest (like the one he shared with his best friend, Steve) to the grand old Deer Foot Lodge founded in 1912 in Vilas County. On the Hunt is the perfect preparation for the avid sportsman's annual fall trek with friends and family into the woods.
