**What is the unit rate - edu-answer.com**

Examples of How to Find Unit Rate or Unit Price - Ryan purchased 3 apples for \$1.80. What is the unit price, or the cost of one apple? We want to know the price per apple unit so we set up a ratio with the number of apples in the denominator. The total price goes in the numerator. So the fraction is 1.80/3. Complete the division: 1.80 ÷ 3 = .60. You can conclude that the per apple price unit rate is \$0.60/1.
