The laboratory companion to Introduction to the Biology of Marine Life by James L. Sumich and John F. Morrissey, this laboratory manual further engages students in the excitement and challenges of understanding marine organisms and the environments in which they live. Students will benefit from a more thorough examination of the topics introduced in the text and lecture through observation and critical thinking activities in the Laboratory and Field Investigations in Marine Life. Also, the lab manual includes suggested topics for additional investigation, which provides flexibility for both instructors and for students to explore further various topics of interest. The only lab manual of its kind, Laboratory and Field Investigations in Marine Life is the ideal complement to any marine biology teaching and learning package!

Available now to FDA-regulated organizations, this manual allows facility managers to look at their operation's regulatory compliance through the eyes of the government. Because this is the primary reference manual used by FDA personnel to conduct field investigation activities, you can feel confident you are preparing appropriate planning or action. This manual includes revised instructions regarding the release of information and covers FDA's policies and expectations on a comprehensive range of topics: FDA's authority to enter and inspect, inspection notification, detailed inspection procedures, recall monitoring, inspecting import procedures, computerized data requests, federal/state inspection relationships, discussions with management regarding privileged information, seizure and prosecution, HACCP, bioengineered food, dietary supplements, cosmetics, bioterrorism, and product disposition. The manual also includes a directory of Office of Regulatory Affairs offices and divisions.
