project aimed at finding out the effectiveness of instructional materials the teaching of science lessons. Teaching and learning aids are essential in the teaching of science, they give holistic understanding of the subject Content there by making the learners active in class and motivated. The study was conducted in Isoka District of Zambia. The results showed that there is positive achievement in learners taught by exposing them to teaching and learning aids. Learning and teaching sometimes are challenging. Several approaches are needed to make teaching and learning easier and effective. The terms learning and teaching have been defined by many different scholars and organizations, some of which are: The United Nations Educational, Scientific and Cultural Organization defines learning as any change in behavior, information, knowledge understanding, attitudes, skills or capabilities which can be retained and which cannot be ascribed to physical growth or to the development of inherited behavior patterns.

Biological sciences have been revolutionized, not only in the way research is conducted -- with the introduction of techniques such as recombinant DNA and digital technology -- but also in how research findings are communicated among professionals and to the public. Yet, the undergraduate programs that train biology researchers remain much the same as they were before these fundamental changes came on the scene. This new volume provides a blueprint for

bringing undergraduate biology education up to the speed of today's research fast track. It includes recommendations for teaching the next generation of life science investigators, through: Building a strong interdisciplinary curriculum that includes physical science, information technology, and mathematics. Eliminating the administrative and financial barriers to cross-departmental collaboration. Evaluating the impact of medical college admissions testing on undergraduate biology education. Creating early opportunities for independent research. Designing meaningful laboratory experiences into the curriculum. The committee presents a dozen brief case studies of exemplary programs at leading institutions and lists many resources for biology educators. This volume will be important to biology faculty, administrators, practitioners, professional societies, research and education funders, and the biotechnology industry.
